2. Why it is a lean and not a play

The dog composite, the 66% engine behind the Tier 1 plays, is flat here. The DAL case is almost entirely the regression family: GB is a favorite off a clean 24-point win with 31 points, 432 yards and net EPA +38 against a Bears team that lost by 24. Six cells fire off that one game, all in the 42% to 47% range, and they overlap. GB's favorite screen is +4 in its favor with real breadth (10 cells), so the two families cancel to a thin lean.

3. Season profile through week 5 (rank of 32)

Stat	DAL	GB
Off EPA / play	+0.130 (7)	–0.021 (17)

Line column is the team's own number, positive = favorite. Game totals: DAL 48, 57, 65, 64, 40 (avg 54.8); GB 61, 37, 49, 31, 38 (avg 43.2).

5. Total 53.5: pass

O/U	Cell	Over %
U	two worst defenses pair	42.8
O	most def-pen 1st downs pair	54.9

Net zero. DAL games average 54.8 points, GB games 43.2. The number sits between the two environments and no cell separates it.

6. Market

DAL +1.5 at –115, GB –105. Nothing on the number; a pick with a hook. Public is 62% of bets on GB (BetMGM sheet) and the line moved from DAL –1 at open to GB –1.5, so DAL is the contrarian side.

7. Entry

Lean DAL +1.5. Half-unit posture relative to a Tier 1 play. No total. Invalidation: none pre-kick.
